

Denials Recovery Services

Appeal and recover services that overturn payor, clinical and administrative denials

Recover lost revenue and increase efficiency

nThrive's Denial Retrospective and Concurrent Denials Recovery Services recover lost revenue for your facility on a contingency basis by appealing clinical and technical denials. Detailed reports of denial activity by payor, physician, DRG and admissions source assist your health system in moving toward the ultimate goal of denial prevention.

- Redeploy in-house resources to address sources of denials, such as care-related delays, case management shortfalls and patient access issues
- View real-time status of appeals in a transparent workflow process
- Access a team of experienced clinicians to write all clinical appeals
- Appeal difficult administrative no-authorization denials clinically and support the medical necessity of the visit

Denial reporting

nThrive provides your organization with exceptional denial reporting for early intervention and prevention of future denials. With nThrive denial reports, you can effectively define efficient case management processes, reinforce effective documentation practices and significantly reduce your gross denial rate.

- Track user productivity
- Obtain knowledge critical to understanding causes of denials
- Uncover and relieve bottlenecks due to unidentified payor denials
- View reports of denial rates by physician and payor
- View reports by denial reason code
