## Connie Perez to lead Advisory Services

nThrive is pleased to announce the appointment of Connie Perez as senior vice president of nThrive Advisory Services. Perez, who was leading Clinical Integrity as well as driving the Adreima Commercial integration, brings a wealth of expertise and domain knowledge to her new role. She will lead the consulting business at nThrive, focusing on four imperatives: clinical and financial integration, solutions strategy, reimbursement strategy and business transformation.

As an RN, Perez held multiple nursing leadership roles in pediatric care settings before earning an MBA from Kellogg Executive Management Program which prepared her to represent both the clinical and financial perspectives in patient advocacy. Ultimately, she joined a start-up clinical audit business that grew from a small client base of seven hospitals into Adreima.

With such an impressive record, nThrive is fortunate to have Perez lead Advisory Services and continue to grow nThrive's long-term success.
