- How to build an effective audit program that fits your organization
- Chart selection
- Review documentation to support 1500 data
- Understanding how to ensure EHR systems are coding your correctly

How can your organization achieve financial success, quality outcomes and avoid costly penalties

A quality auditing program

can identify areas of opportunity for risk and / or areas of concern as well as identify areas that are not at risk

Areas of risk are

monitored more frequently and to goal is to improve the desired outcome

Discover how to build a coding audit program with the breadth and depth that fits your organization

Access the objective of the audit outcome to accurately capture the audit details

Identify your audience and the overall deliverable to productively conduct the audit

Questions to ask before you start the audit

- ✓ What is the scope of the audit?
- ✓ Who are the stakeholders?
- ✓ What is the data to be used for?

Chart selection: Ensure complete, well-rounded compliance program

How do you chose audit sample?

- **Random** – Looking for areas of improvement
- **Targeted** – Deeper dive into areas of suspected or known risk
- **Audit size** – too small insufficient data too large skews data and bogs down the process

What to do with the data?

- **Share Share Share!!!**
- **Validate** – offer validation to those audited of the great job!
- **Educate areas of deficiency if needed**
