

Quantify Downstream Value Across the Health Care Continuum

Downstream Analyzer is a cloud-based product that accurately measures the downstream value of an employed physician, point-of-care location, service area, marketing campaign, or other patient point of entry.

Integrate hospital inpatient & outpatient data with physician practice data

Measure various patient entry points & multiple time periods

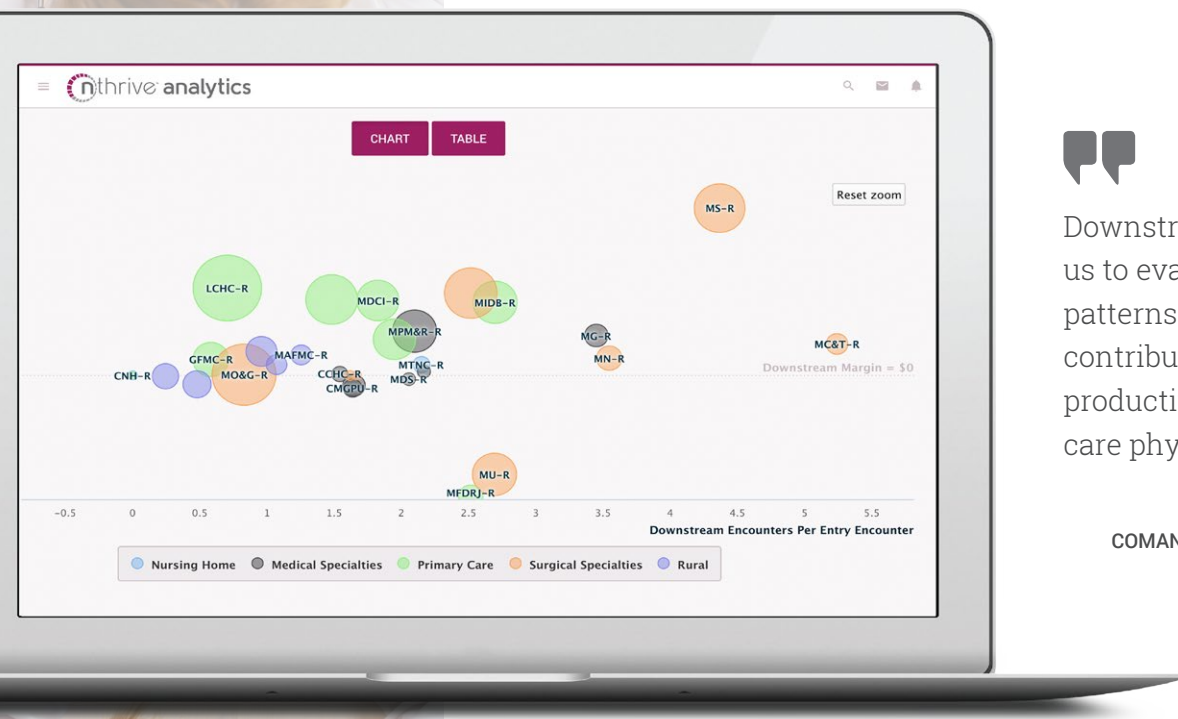

Track downstream value & cost of all services

Calculate downstream volume, revenue, direct & indirect cost, and margin

Track longitudinal consumption patterns by hospital service line, ancillary service, procedure code, ZIP code, physician, specialty, location, etc.

Rationalize acquisitions or affiliations accurately with non-anecdotal data

Implement in 60 days

Downstream Analyzer allows us to evaluate our patient care patterns, the cost of that care, contribution margin and overall productivity of our primary care physicians."
