

Dear Valued Customer,

If reducing your organization's A/R days and accelerating cash flow is an important initiative, I'd like to speak with you about real-time claim validation within your electronic health record software through nThrive's first-to-market Accelerated CRD Reconciliation offering. Here's how your organization benefits:

- Accelerate cash flow by one day or more for claims that require issue resolution in full CRD
- Speed up identification and resolution of errors in real-time within your EHR utilizing nThrive's industry-leading edits
- Provide a single source of truth within your patient accounting system to minimize the risk of claim audit
- Reduce payor denials through nThrive's > 28,000 institutional and professional claims edits

This new capability is already in operation at a pilot site where the client is discovering just how quickly they can identify, resolve and validate claims within their patient accounting software using these embedded edits from nThrive.

Our clients typically generate a 98.5% payor acceptance rate, and the new Accelerated Claims Reconciliation capability offers the opportunity to further reduce your A/R days.

Please call me today to learn more about nThrive's Accelerated CRD Reconciliation and our Claims Management solution that is ranked KLAS Category Leader. nThrive also offers a comprehensive suite of revenue cycle solutions that work with Epic to help you improve performance from Patient-to-Payment.

Best regards,
