

nThrive Education Releases New Courses in May

The May release of nThrive Education courseware is now available in HealthStream. A large number of courses have been added to our ever-expanding library. All courses in the release are listed here by title under their respective product and category.

The current Revenue Cycle course catalog can be accessed [here](#) and the current Clinical course catalog [here](#). Both catalogs will be updated as courses are added each month. The catalogs also display courseware scheduled for the June release, which is subject to change.

This list reflects all courseware in the release. Be sure to check the nThrive Education product you have licensed in the catalog to see if it is included in your purchased product prior to checking the system.
