New SimLab! nThrive Education Revenue Cycle Education

nThrive Revenue Cycle Education is releasing a first-of-its-kind Revenue Cycle SIMLAB catalog. The next nThrive SIMLAB to be published is based on the UB-04 claim form, also known as the CMS-1450 form. The Revenue Cycle SimLab provides the same hands-on experience as the Insurance Card and Driver's License SimLabs.

The labs provide a safe environment for repetitive, skill-building exercises that help improve productivity and reduce errors. Additional revenue cycle tools are being created each month. If you have any suggestions about other tools your clients have expressed interest in, or an idea you believe would benefit clients, send your suggestion to jjust@nthrive.com.

The SIMLABs are designed to cultivate advanced skill sets for Patient Financial Services personnel who must interpret and manage complex revenue cycle forms.
