Agenda

- Discuss methods to determine patients that need to receive a SCP
- Describe how a program determines and documents curative, maintenance, and palliative treatments
- Implement strategies to work with the Survivorship Data Coordinators to provide SCP information
- Describe a process in determining a real time denominator

HUB Model at the Clinical Cancer Center

- **“Hub” Model** puts the patient at the center, surrounded by a full complement of physicians and other experts resources and support.
- **Physicians, nurse and others** are grouped by the kind of cancer they treat, not the kind of medical service they provide.
- **Patients access all caregivers** they need through a single cancer team.
- **Specialized hub team** for every kind of cancer.

Where did we start?

Annual analytic case load once cases for a year have been completed

Run detailed listing of cases by FIPS site groups

Manually excluded cases (easy ones first)

In depth case analysis

What we did next

Looked closer pts who had recurred or developed a distant metastasis

Re-ran the case lists to determine if more became ineligible

Met with Survivorship Data Coordinators group on a monthly basis

What's Next?

- **Looking closer** at bladder cases
- **Adjust “real time”** denominator
- **Utilize tracking list** to subtract cases from the denominator
- **Work with** the various programs to develop a successful
- **Process-mirror** what has work for us in the past
