

CDM Enterprise

Maintaining an accurate, corporate chargemaster is one of the most important aspects of the revenue cycle and can be a daunting challenge for health systems

Key benefits

nThrive Web-based CDM Enterprise incorporates all of the powerful features of CDM Manager®, with the added benefit of enabling hospital systems to manage multiple charge description masters (CDM) from a single interface. This promotes corporate governance and consistency throughout the organization. With CDM Enterprise, providers can:

- Build and maintain a corporate standard
- Connect individual chargemasters to the corporate standard
- Improve communication and compliance
- Manage multiple chargemasters from a single log-in

Features

Establish the corporate standard

CDM Enterprise facilitates compliance, continuity and control of the charge process by establishing a corporate standard. Users also have optional access to a comprehensive index of common charge items and our Best Practice Catalog to assist in building a corporate standard and monitoring both static and dynamic line items. With CDM Enterprise, providers can:

- Quickly link local chargemasters to a corporate standard using a powerful Search and Link feature—even while retaining the ability to highlight specific charge items requiring local input prior to synchronization
- Create user-defined, field-specific synchronization, incorporating changes made to the corporate standard to all linked chargemasters
- Identify charge items at the local level that are not in compliance with the corporate standard

Manage multi-facilities

CDM Enterprise reduces the number of resources required to maintain multiple chargemasters and provides the ability to:

- Define rights for users authorized to access each chargemaster in the hospital system
- Establish a central point of coding and compliance education to all departments, enhancing communication throughout the facility

Get assistance with nThrive Chargemaster Consulting services

The nThrive team includes credentialed experts that offer a broad spectrum of chargemaster and other revenue cycle consulting expertise, delivered with a customized approach to meet the specific objectives and goals of a hospital or health system.
